

## National Electrical Manufacturers Association (NEMA)

NEMA's field representatives work to promote the use and adoption of the National Electrical Code® (NEC®). As advocates of safe electrical systems and installations, NEMA field representatives make a valuable contribution to the public safety.

## National Fire Protection Association (NFPA)

NFPA's regional offices promote the adoption of NFPA codes and standards by state and local authorities, assure appropriate representation at code hearings and legislative sessions, coordinate activities with NFPA staff and key constituencies, and identify ways NFPA services can improve fire, building, and life safety in their regions. These regional offices also support research, educational, membership, and other NFPA activities.

## Consumer Products Safety Commission (CPSC)

The U.S. Consumer Product Safety Commission is charged with protecting the public from unreasonable risks of serious injury or death from thousands of types of consumer products under the agency's jurisdiction. The CPSC is committed to protecting consumers and families from products that pose a fire, electrical, chemical, or mechanical hazard or can injure children. The CPSC's work to ensure the safety of consumer products - such as toys, cribs, power tools, cigarette lighters, and household chemicals - contributed significantly to the 30 percent decline in the rate of deaths and injuries associated with consumer products over the past 30 years.

## Underwriters Laboratories (UL)

UL's field engineering services organization provides timely solutions for situations where code authorities need technical assistance to approve the installation of equipment that does not bear a UL Mark. They work closely with the code authority and other parties to make sure their investigation address any questions and concerns. Most investigations can be scheduled within a few days. Field evaluations can be requested to evaluate acceptability of unlabeled equipment.

## MET Laboratories

MET strives to consistently satisfy their customer's needs for testing and certification. This organization has been certifying, listing, and labeling products for electrical product safety for more than 40 years. MET is currently qualified to certify products in 170 UL Standard categories. This includes consumer products, computing and telecommunications products including NEBS equipment, medical devices, and equipment designed for hazardous locations.

## Intertek

Intertek provides speed and expertise with engineers that are familiar with your product as well as the applicable electrical safety requirements that unlabelled products must meet. They can quickly and cost-effectively expedite the field labeling process to secure the approval of your local or state inspector. This organization is continually involved with local authorities having jurisdiction (AHJ); attend meetings and forums to gain a complete understanding of what inspectors need and want. During each field evaluation this organization works closely with the local inspector and communicates the intended process to ensure the AHJ is completely satisfied.
